

Addendum 1

1. The scope of work is to include the inspection, testing and servicing of fire alarm systems, smoke detectors, pull stations and alarm bells, however there is no information or counts provided for these systems at any of the locations.

Schedule A is sorted by location. Each line on the Schedule A is an item that needs to be inspected. The list may or may not be complete. There is an incentive for the proponent to find more units and confirm the completed list so they can charge more per unit rate.

2. Are there any fire sprinkler system at any locations?

The Hall, Civic Center, Arena.

Most locations do not have sprinklers.

3. The Aquatic Center and Don Cruikshank Arena do not have any equipment counts listed. Are these going to be supplied?
